LONDON METROPOLITAN UNIVERSITY

PROFESSIONAL WORK PLACEMENT

<u>LEARNING LOG</u>

YOUR ID: 18030043

YOUR NAME: Sagar Poudel

YOUR COURSE: Work Related Module (WRL)

YOUR WRL TUTOR: Mr. Bibek Khanal

PLACE OF WORK: Group Phoenix Pvt. Ltd.

DATES OF ENTRIES IN LEARNING LOG:

       2021-02-08 to 2021-02-18
       2021-02-19 to 2021-03-02
       2021-03-03 to 2021-03-14
       2021-03-15 to 2021-03-25
       2021-03-26 to 2021-04-08
       2021-04-09 to 2021-04-21

LEARNING LOG

For the period 2021-02-08 to 2021-02-18

What have I done? (relate tasks to Learning Outcomes)

I met my supervisor and he introduced me to other coworkers. Afterwards, we had a conversation about tasks that I have to do during my internship period. He gave me tasks of making a Restro Point of sale system using Laravel framework(LO1). As per his instruction, I started my development by researching how to carry out Restro Point of sales using Laravel framework(LO2). I have searched and analyzed multiple similar projects related to the Point of Sales system(LO2). As Laravel project is a web development framework, I had also revised my knowledge on HTML, CSS and JavaScript(LO3) in order to get advantage on building software/systems. Along with researching and gaining knowledge on HTML, CSS and JavaScript, I had also started designing wireframes on Restro POS(LO3). Designing was done by using https://balsamiq.com (LO3). I have also designed and implemented initial and final Er diagram for making a database of system(LO1).

What I did well (refer to skills used)

As I had previous knowledge of HTML, CSS and JavaScript which I had learnt from my college. Due to this I only had to revise some of the terms. As I have learnt the basics of Laravel Framework in Summer Class of college, it was no difficulty to start the project. I have developed quite good research skills because of assignments and coursework given to us in college. My research skills helped me a lot in searching about Pos systems and similar projects related to Restro POS systems.

What I could improve on (i.e. skills I want to improve)

 As this Laravel framework was not fully familiar to me but I managed to work on development of the system in order to improve my development skill. I am still learning and want to improve my research skills and development skills so it can help me in various aspects especially in time management.

Action I can take to improve my skills and learning (make these "SMART"):

Goal: To improve my Development Skill

Action: Started Development of Restro POS using Laravel Framework

Timing:
